

Dr Jade Quinton Maggs

Fisheries Data Scientist

Brisbane, Australia | +61 493 007 125 | jademaggs@gmail.com | [LinkedIn](#) | [ResearchGate](#) | Scopus *h*-index: 13 | [GitHub](#) | jademaggs.github.io

Profile

I am a fisheries scientist and data professional with 18 years of experience across South Africa, New Zealand, and Australia. I specialise in recreational fisheries survey design and harvest estimation, including the design and delivery of national-scale boat ramp creel survey programmes, fisheries database development, spatial analysis and mapping, and data analysis and modelling. I work primarily in R, SQL, and QGIS. I am registered under an Australian ABN and now available for short-term remote consulting engagements, with a particular interest in Pacific fisheries data and monitoring projects.

Core Capabilities

- Fisheries data management and pipeline development
- Recreational fisheries survey design and harvest estimation
- PostgreSQL and MS SQL Server database architecture
- R-based reproducible reporting (R Markdown, Quarto)
- GIS and spatial analysis (QGIS, R)
- GLM and CPUE standardisation
- Electronic data acquisition system implementation
- Monitoring programme design and support
- Git-based version control (GitLab, GitHub)
- Power BI dashboards and Power Automate workflows

Selected Experience

Fisheries Queensland, Department of Primary Industries

Brisbane, 2025–present

Member of the Fisheries Monitoring Team. Building automated data tracking workflows using Power Automate and Power BI. Supporting cloud data migration (Azure, Microsoft Fabric) and contributing to boat ramp recreational fisheries data collection.

Earth Sciences New Zealand (formerly NIWA)

Wellington/Auckland, 2020–2025

Group Manager and Fisheries Scientist leading national boat ramp creel surveys, recreational harvest estimation, and CPUE standardisation. Managed all fisheries data from research and observer programmes for NIWA and Fisheries New Zealand. Led development of PostgreSQL databases and electronic data acquisition systems. Managed teams of five to six staff.

Ministry for Primary Industries, New Zealand

Wellington, 2019–2020

Senior Analyst contributing to ecosystem-based fisheries management and Marine Protected Area science advisory work.

Oceanographic Research Institute

Durban, South Africa, 2006–2018

12 years of progressive roles in recreational fisheries monitoring, MPA surveys, biological sampling, and database development. Delivered postgraduate lectures on stock assessment and R programming at the University of KwaZulu-Natal.

Tools and Technologies

Languages & analysis:	R, SQL, Bash, $\text{\LaTeX}$
Databases:	PostgreSQL, MS SQL Server, Azure, Microsoft Fabric
GIS:	QGIS, R spatial packages
Reporting:	R Markdown, Quarto, Power BI
Workflow:	Git, GitLab, GitHub, Power Automate, Linux

Qualifications

- PhD (Fisheries Science) | Rhodes University, South Africa, 2017
- MSc (Biology) | University of KwaZulu-Natal, 2011
- BSc (Zoology, specialising in environmental management) | University of South Africa, 2009

Research Output

24 peer-reviewed journal articles · Scopus *h*-index: 13 · 81 technical reports · 22 conference presentations.
See [ResearchGate](#) for full publication list.
